

PROFILE

Computer Science undergraduate with hands-on experience in cloud infrastructure, DevOps pipelines, and full-stack development through academic and personal projects. Experienced with Docker, Kubernetes, AWS, and CI/CD workflows. Interested in applying DevOps and cloud engineering skills in a Software Engineering or DevOps internship.

EDUCATION

Bachelor of Science in Computer Science 2023 – Present | Trincomalee
Trincomalee Campus, Eastern University
Current GPA - 3.78

TECHNICAL SKILLS

Programming Languages Java, Python, JavaScript, TypeScript	DevOps Docker, Kubernetes, Terraform, GitHub Actions, ArgoCD, AWS, Git, Linux
Databases PostgreSQL, MongoDB	Frontend Technologies React, HTML, CSS

PROJECTS

- University Website Redesign Prototype (Academic Project)

Source Code 

 - Redesigned the university's official website as part of an academic **Human Computer Interaction** (HCI) module, improving layout structure, navigation flow, and content organization to enhance usability and information accessibility.
 - Tech Stack** - Figma
- Intelligent Timetable Generator (Academic Project)

Source Code 

 - Developed an expert system for the **Logic Programming and Expert Systems** module that automatically generates a conflict-free university timetable using rule-based logic in Prolog.
 - Tech Stack** - Prolog, SWI-Prolog
- KubeStock Cloud-Native Inventory Management System (Group Project)

Source Code 

 - Developed a cloud-native inventory management system as part of the **WSO2 Linux System Administration and DevOps Engineering training program**, implementing microservices architecture with automated infrastructure, CI/CD pipelines, and Kubernetes-based deployment.
 - Tech Stack** - Docker, Kubernetes, Terraform, ArgoCD, Prometheus, Grafana, Loki, CI/CD Pipeline.
- GitOps CI/CD Pipeline for Go Application

Source Code 

 - Built an end-to-end CI/CD pipeline that automatically builds, tests, containerizes, and deploys a Go application to a Kubernetes cluster, enabling continuous integration and automated delivery from code commit to production environment.
 - Tech Stack** - GitHub Actions, Docker, Kubernetes, ArgoCD, Helm
- High-Availability AWS Architecture Deployment

Source Code 

 - Designed and deployed a highly available AWS cloud architecture by creating a custom VPC with public and private subnets, integrating an Application Load Balancer, Auto Scaling Group, and Amazon RDS to ensure scalability and reliability of the application infrastructure.
 - Tech Stack** - AWS, VPC, ALB, ASG, RDS, Route53, CloudWatch, SNS.
- AI-Powered Applicant Tracking System (ATS)

Source Code 

 - Built a web application where users upload their resumes to receive an ATS compatibility score and AI-generated suggestions to improve their resume.
 - Tech Stack** - React, TypeScript, JavaScript, Tailwind CSS, AI API Integration.

ACHIEVEMENTS

- Finalist – Yarl Geek Senior Challenge (YGC)

2025

Yarl IT Hub
- Cre8X 2.0 – National UI/UX Design Competition (Top 8 Finalist)

2025

General Sir John Kotelawala Defence University Sri Lanka

CERTIFICATIONS & PROFESSIONAL TRAINING

- WSO2 – Linux System Administration & DevOps Engineering

06/2025 – 01/2026

Industry-Sponsored DevOps Training Program

 - Completed hands-on training focused on Linux system administration, DevOps tools, automation practices, and continuous integration and deployment methodologies.
- KodeKloud – DevOps & Cloud Tools Training

Certification

 - Completed structured hands-on labs covering Docker, Kubernetes, Ansible, Jenkins, Git, and Linux, gaining practical experience in containerization, orchestration, CI/CD automation, and infrastructure management.

SOFT SKILLS

- Problem Solving
 - Communication
 - Time Management
- Team Collaboration
 - Analytical Thinking
 - Adaptability
